Company Highlights

AGR Diamond Tools manufactures diamond tools that are needed to build and maintain roads, bridges, runways, flooring, and buildings of all types. With the hundreds of billions of dollars that have been allocated for infrastructure spending, AGR Dealers are strategically positioned to reap the profits. As an AGR distributor, you would call on and service construction contractors in the vast and expansive natural stone industry - which includes concrete, brick/masonry, granite, marble, engineered stone, and other natural stone contractors and fabricators. Some of the types of tooling you would be distributing include diamond blades, core bits, cup wheels, router bits, CNC tooling, grinding stones, polishing pads, and hundreds of other products that we manufacture.

Products & Services Overview

As a global leader in the contract manufacturing & distributing of high quality diamond tools, AGR Tools has been serving the construction and natural stone industries worldwide since 1983. AGR Tools, Inc. is the only contract manufacturer of a complete line of diamond tools designed for maximum performance for each application. Our products include turbo blades, polishing pads, cup wheels, core bits, tile blades, masonry blades, concrete blades, CNC tooling, engineered stone products and other high-end diamond tools.

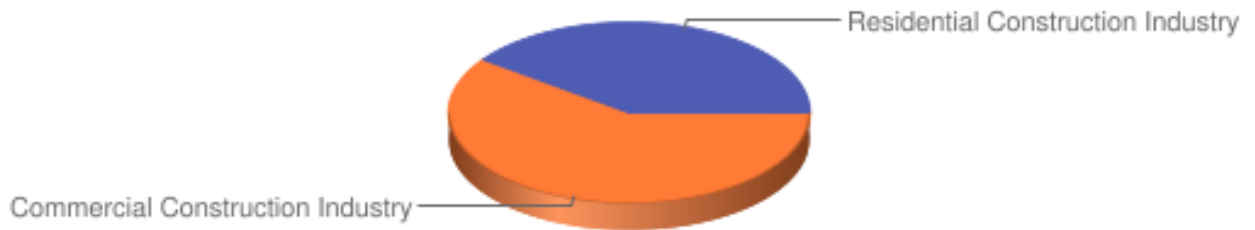

AGR Tools made with Matrixx Maxx Technology yield only the highest level of quality and performance. Try them out in our on-line store where ground shipping is always FREE. And if you like our tools, read more about our dealership opportunity.
